“TREBLE” TESTAMONIAL

In last month's CropLine, Atlantic-Pacific Trading Co. announced the release of its new product.....**TREBLE**—a “SLOW RELEASE NITROGEN AGENT.”

We thought the best way to tell you more about Treble was to let a grower that used it last year share his experience with you. **Mr. Schmidt said,**

“I treated 28% nitrogen with the new experimental product “Treble” at 3 quarts per ton on my corn in 2010.

I applied it on July 3, 2 010 with drop hoses using a John Deere sprayer—I received 10 inches of rain in July. When I harvested the corn----I liked what I saw!

I saw more corn in the bin and on yield maps, on 25 acres treated with “Treble”-----I saw a good 20 bushel yield increase---I definitely will treat a bunch more corn acres in 2011 with “Treble” in my 28% nitrogen, to see if I obtain the same yield increase.”

**Randy Schmidt
Corn & Soybean Grower in Outagamie County, Wisconsin**

RATE: 3 Quarts per Ton of 28%/32% UAN Solution

Treble maintains UAN availability for your crops. Its slow release polymer blend hooks the UAN to the soil and releases it during essential stages of plant root development.

IMPROVE ‘N’ EFFICIENCY simply POUR ‘N’ GO

Package Size: 36 cases 2 x 2.5 U.S. gal /pallet =180 gallon treats 240 Ton UAN Solution

Disclaimer:

Treble is an experimental product and just finished its first year in limited field trials. This testimonial should not be interpreted as a guarantee you will receive like results. Your results will vary because of soil, weather, weeds, insect, etc. Insufficient control of pests and/or injury to the crop to which the product is applied may result from the occurrence of: unusual weather conditions, failure to follow the label directions, or good application practices.

All of these are beyond the control of Atlantic-Pacific Trading Company (APTC) or the seller. Also, failure to follow label directions may cause injury to crops, animals, man or the environment. Please read label for full warranty prior to use.
