

STORAGE: Do not allow this product to freeze. Recommended storage temperature is 33 degrees Fahrenheit, or higher. Store in a secure area, away from children. Store in original container only. Keep container tightly closed, do not allow water to be introduced into the contents of this container. Do not contaminate water sources by runoff from cleaning of equipment, disposal of equipment wash waters or spray waste. Do not store near heat, or open flame. Do not store with oxidizing agents or ammonium nitrite.

DISPOSAL: This product by itself does not have any disposal requirements, but once used, the cleaning solution resulting from its use must be disposed of according to label of the pesticide last used in the spray tank.

CONTAINER DISPOSAL: Triple rinse (or equivalent) and add rinsate to spray tank, then offer for recycling or reconditioning, or puncture and dispose of according to state and local authorities. If burned, stay out of smoke. Review WORK-HORSE MSDS for Emergency Information (Section 1) and Accidental Release Measures (Section VI).

What to do in Case of Contact:

- If on Skin:** Remove contaminated clothing and wash with soap and water. Call a physician if irritation persists.
- If Swallowed:** Rinse mouth immediately with water. Dilute any ingested material by drinking water or preferably milk. Do not induce vomiting. Call a poison control center or doctor for treatment advice.
- If in Eyes:** Hold eye open and rinse slowly with clean water for 15 minutes. Remove contact lens, if present, after 5 minutes, then continue rinsing eye. Call a poison control center or doctor for further treatment advice.
- If Inhaled:** Move to fresh air and call a physician if irritation develops or persists.

If contact is made with a spray solution containing pesticides, follow the "Statement of Practical Treatment"

FOR COMMERCIAL OR FARM USE ONLY
"Why Horse around with Anything Else?"

All ingredients are accepted for use under CFR 40 CFR 180

CAUTION:

KEEP OUT OF REACH OF CHILDREN

Liquid may cause eye injury. Do not get in eyes. In case of contact with eyes, wash for 15 minutes with plenty of water. Get medical attention if needed.

PRECAUTIONARY STATEMENTS:

BEFORE USING THIS PRODUCT, READ ALL PRECAUTIONS, DIRECTIONS FOR USE, CONDITIONS OF SALE - LIMITED WARRANTY AND LIMITATIONS OF LIABILITY.

Avoid contact with eyes. Can cause eye injury, wear eye protection when using, such as safety goggles, safety glasses or face shield. Avoid contact with formulated product. Do not take internally. Avoid contact with or inhalation of the spray mist. Follow all precautionary statements on the accompanying pesticide(s) label(s).

ATLANTIC-PACIFIC TRADING
COMPANY, INC.
625 Plumas Street,
Reno, NV 89509

NET CONTENTS: 1/2 GAL. (64 FL. OZ.)

ENVIRONMENTAL HAZARDS

Do not contaminate water sources by cleaning of equipment or disposal of rinsate.

CONDITIONS OF SALE LIMITED WARRANTY AND LIMITATIONS OF LIABILITY

Read the conditions of Sale Warranty and Limitations of Liability and Remedies before using this product. If the terms are not acceptable, return the product, unopened and the full price will be refunded.

The directions on this label are believed to be reliable and should be followed carefully. Insufficient control of pests and/or injury to the crop to which the product is applied may result from the occurrence of extraordinary or unusual weather conditions or the failure to follow the label directions or good application practices, all of which are beyond the control of Atlantic-Pacific Trading Company (APTC) or the seller. In addition, failure to follow label directions may cause injury to crops, animals, man or the environment. APTC warrants that this product conforms to its chemical description and is reasonably fit for the purpose referred to in the directions under normal conditions of use, but neither this warranty nor other warranty of merchantability or fitness for a particular purpose, express or implied, extended to the use of this product contrary to label instructions, or under abnormal conditions. The exclusive remedy against APTC for any cause of action relating to the handling or use of this product shall be limited to, at APTC's election, one of the following: 1) Refund of the purchase price paid by buyer or user for product bought, or 2) Replacement of the product. To the extent allowed by law, APTC shall not be liable and any and all claims against APTC are waived for special, indirect, incidental or consequential damages or expense of any nature, including, but not limited to, loss of profits or income. APTC and the seller offer this product and the buyer and user accept it, subject to the foregoing conditions of sale and limitation of warranty, liability and remedies.

GENERAL INFORMATION

- WORK-HORSE** is an effective, superior grade spray tank cleaner for agricultural use.
- WORK-HORSE** will remove pesticide and adjuvant residues and hold them in the rinse solution.
- WORK-HORSE'S** effectiveness is not reduced by hard water, which contributes to accumulation of residues in sprayer tanks and plumbing.
- WORK-HORSE** is missable and compatible with all sprayer equipment and contains corrosion inhibitors.
- WORK-HORSE** also contains ingredients to minimize wear and damage to sprayer pump seals.

All-Purpose Rigs:

WORK-HORSE lessens contamination when changing from one chemical to another.

Single Purpose Rigs:

WORK-HORSE assures accurate dosage by removing chemicals from the previous batch.

USE WORK-HORSE BEFORE SPRAYING TO:

- Remove scale, dirt, etc.,
- Reduce strainer clogging
- Protect pump and valves
- Minimize nozzle wear.

This product neutralizes acidic-type chemicals.

SUGGESTED USE RATE

Use **WORK-HORSE** at a rate of 1-quart per 100 gallons of water.

In special tank conditions of difficult chemical build-up or obvious chemical or dirt-grime, you can use a more concentrated mixture of 1-4 quarts per 100 gallons.

LARGE VOLUME SPRAYERS — Use at a 400:1 ratio (1 gallon of Work-Horse to 400 gallons of water). Close boom valve and add the water. Adjust the solution rate as needed for individual conditions.

FOR LARGE TANKS — 100-400 GALLONS: Close boom valve and add 50 gallons of water to tank, then turn on agitation and add one quart of **WORK-HORSE** while circulating the liquid through the valves, hoses and pump, by opening the bypass. Use the hand boom to wash down the tank interior cover. Once the pump and interior have been cleaned, open boom valve and empty tank by spraying out through boom and nozzles. Take care to observe proper disposal of spray solution. Rinse tank by following the same procedure using water only. A three-minute rinse using cold water is necessary, however if you are changing over to a different chemical, a second rinse will lessen the chance of contamination. When cleaning a tank used for herbicides and chemicals that can cause plant response at low levels, pay particular attention to those parts of the equipment that may absorb the chemical such as hoses, connections, and pump and hand boom packing. Use **WORK-HORSE** as directed but in addition; allow the rinse solution to remain in the sprayer and its parts overnight. **WORK-HORSE**, when used according to label directions, will usually adequately clean the exposed surface of these areas. It is critical that all nozzles, spray tips and screens be taken out and cleaned of any chemicals or debris before placing them back into use. Any final rinsate should be pumped from the tank with no screens or nozzles, since loose chemicals and debris may lodge in them. However, when using these types of chemicals, parts of the sprayer that can absorb product may need to be replaced.

FOR SMALL TANKS — Fill tank half-full of water and use 1 ounce or more of **WORK-HORSE** for 3 gallons of the tank volume.

Hand Held and Back-Pack Sprayers — Use approximately one ounce **WORK-HORSE** per gallon of water, agitate thoroughly, drain and follow with a clean water rinse.

FOR PROBLEM TANKS — When using **WORK-HORSE** to clean tanks left standing or containing built-up residue from extended use, allow the cleaning solution longer time to act. **WORK-HORSE'S** cleansing action may remove rust and scale that was sealing a badly corroded tank, however, it will not harm steel, aluminum, brass or poly tanks and parts if directions concerning rinsing are followed.

SPECIAL PRECAUTIONS / RINSATE TESTING:

The use of **WORK-HORSE** Tank Cleaner has proven effective in removal of residues of Glyphosate and Phenoxyes (Dicamba) in tests conducted. Without proper and full clean out (See above for Suggested Use Rate) APTC does not warranty the **WORK-HORSE** Tank Cleaner (See above Conditions of Sale - Limited Warranty and Limitations of Liability of Remedies). Many variables exist which make consistent tank cleaning difficult. In those cases where complete tank clean out is ineffective, some pesticides, such as phenoxyes, may leave persistent or hard-to-remove residues in hard-to-reach or hard-to-see tank locations. In these cases, in order to ensure that all residues have been removed, we highly recommend the following; Apply a sample of the tank rinse water to sensitive plants (tomato, cotton, ornamentals, etc.) and observe for changes in plant physiology, such as wilting and severe stress over a 24-hour period. If plant symptoms as those mentioned occur, repeat the tank cleaning process with **WORK-HORSE** Tank Cleaner, and retest on plants again until rinsate does not affect plant(s) tested.
