“HOOK and INSECTICIDES”

NL#2

There are a few things that make insecticides work well---which gives a good kill.

One is coverage and the other is penetration. Hook has the ability to do thatand more!

Hook's CV% rating with airplanes is the best. The CV% = Coefficient volume + total spray pattern of all passes. CV% 9-10---the best you can get. Hook has the ability to make any chemical, like insecticides, to work better because of its penetration ability. The more insecticide that you can get on the plant and into the pest, the more effective the kill and the longer it will last.

Would it not be beneficial to have a longer lasting kill? Plus, it makes your spray rainfast. Think of it in this way. If Hook can make Roundup kill weeds that it would not kill by itself, then why wouldn't it do the same with insecticides?

Just remember deposition and penetration is the name of the game for
